

# ARCHIVE SHUTTLE

MOVE ARCHIVES ANYWHERE

**ARCHIVE SHUTTLE IS THE PROVEN SOLUTION WHENEVER AN ENTERPRISE VAULT ARCHIVE NEEDS TO BE MOVED – INDEPENDENT OF THE ENTERPRISE VAULT VERSION OR CONFIGURATION.**

With its unique ability to track shortcut changes in the user's mailbox and prevent duplicate shortcuts in the target mailbox - it is the tool of choice for Enterprise Vault administrators in charge of any kind of migration or consolidation project.

**Archive Shuttle has the following use cases:**

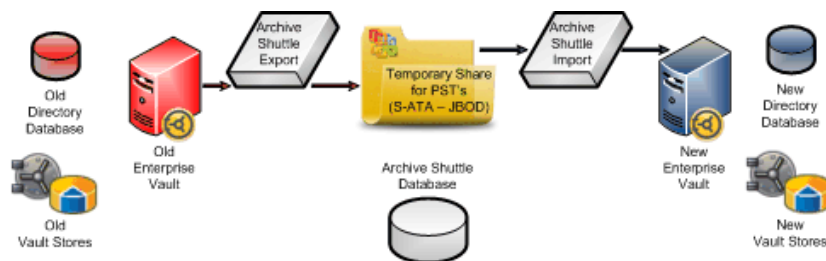

- Centralize a series of physically dispersed Enterprise Vault sites into one central site
- Merge Vault Stores for consolidation
- Split users into multiple Vault Stores inside a single site or to a new site.
- Migrate data between different Enterprise Vault versions
- Extract user archives from corrupted Vault stores
- Move users between sites

In any case, it automates the migration process and increases the reliability and quality of the migrations for administrators and end-users.

## FUNCTIONAL DESCRIPTION

**Archive Shuttle is built around two major processes: Export and import**

The export process of Archive Shuttle saves the content of the selected user archives into a collection of PST files, sorted by the shortcut status and the Retention Category. For each Retention Category there is one PST file containing all items that have a short cut and another PST for all objects where the shortcut has either been expired or manually deleted.

*The use of multiple files enables the import process to retain the status of the short-cut and to map the retention categories between the new and old Enterprise Vault system.*

## KEY FEATURES ARCHIVE SHUTTLE

***Migration of archives between or within Enterprise vault sites***  
*Archive Shuttle moves data across Enterprise Vault directories, sites, Vault Stores and Enterprise Vault versions.*

***Scheduling of export jobs***  
*Export jobs can be scheduled to start processing at a convenient time. The import process starts automatically after the export has finished*

***Automatic renaming or deletion of existing archives***  
*When migrating data across Vault Stores in the same Enterprise Vault Site, the original Archive can be renamed or deleted automatically before the import is started*

***Move "orphaned archives***  
*Archives of leavers or retired staff can be moved using Archive Shuttle.*

## EASY AND SIMPLE ARCHIVE MIGRATIONS

During the export, Archive Shuttle tracks the current location for each shortcut in the user's mailbox, ensuring that shortcuts that have been moved after archiving retain their current location after the import. The Archive Shuttle Importer has the unique ability to map all relevant settings such as retention categories between the old and new system, giving administrators the flexibility to change or keep settings in a comfortable and logical way. The Archive Shuttle Exporter creates job files containing multiple user archives with the same settings and destination.

Archive Name	Mbx Alias	Exported	Assigned Job	Exchange Server	Valid	EV Server	Archive Status
Carina	Carina	<input checked="" type="checkbox"/>	SEBO_01	STAR01	<input checked="" type="checkbox"/>	STAR02	1
Cassiopeia	Cassiopeia	<input checked="" type="checkbox"/>	SEBO_01	STAR01	<input checked="" type="checkbox"/>	STAR02	1
Centaurus	Centaurus	<input checked="" type="checkbox"/>	SEBO_01	STAR01	<input checked="" type="checkbox"/>	STAR02	1
Cepheus	Cepheus	<input checked="" type="checkbox"/>	SEBO_01	STAR01	<input checked="" type="checkbox"/>	STAR02	1
Cetus	Cetus	<input checked="" type="checkbox"/>	SEBO_01	STAR01	<input checked="" type="checkbox"/>	STAR02	1

Coveny	Coveny	<input checked="" type="checkbox"/>	SEBO_01	STAR01	<input checked="" type="checkbox"/>	STAR02	1
Crater	Crater	<input checked="" type="checkbox"/>	SEBO_01	STAR01	<input checked="" type="checkbox"/>	STAR02	1

The Archive Shuttle Exporter creates job files containing multiple user archives with the same settings and destination.

## KEY FEATURES ARCHIVE SHUTTLE

**Correct location of shortcuts**  
Archive Shuttle tracks the current shortcut location in the mailbox and retains the mailbox layout after the import has finished.

**Retention category mapping**  
It has the ability to map retention categories between sites.

**Logging and Audit**  
Full logging and reporting is provided during the export and Import process.

**Jobfiles**  
The notion of "jobs" simplifies the export of large numbers of users and groups of archives with different settings.

**Supported Enterprise Vault Versions**  
The Archive Shuttle Exporter has been tested to work with Enterprise Vault v5 to v8. The Importer integrates with Enterprise Vault 7.0, 2007, 8 and the upcoming V9.0."

## FREQUENTLY ASKED QUESTIONS

### **I want to merge Archives Sites can I use Archive Shuttle for this?**

If you have two different Enterprise Vault sites, you can use Archive Shuttle to merge those two sites into a third one or you can simply export a complete Enterprise Vault installation and integrate it into an existing site.

### **I want to split a Vault Store. Is Archive Shuttle the right tool?**

Yes, you can move user's archives from one Vault Stores to another. Simply select one or more user archive and define the destination Vault Store. The deletion or rename of the source archive is done automatically during the migration.

### **How is Archive Shuttle licensed?**

Archive Shuttle's licensing is based on the same principles as Enterprise Vault. Therefore we count the number of physical users in your Enterprise Vault environment. Please refer to the price list for further details.

### **Which version of Enterprise Vault from supported?**

Archive Shuttle supports export all Enterprise Vault versions, beginning with v5.0 and has already been tested to work with Enterprise Vault 9.0. If you face difficulties with your existing Enterprise Vault 5.0 or 6.0 installation, you can use Archive Shuttle to go directly to version 8.0 or 9.0 ("Boston") and have a clean installation afterwards using the new OSIS Single Instance model.

### **Can I consolidate dispersed Enterprise Vault Installations into a Single directory?**

Yes, Archive Shuttle is able to consolidate remote Enterprise Vault sites into a single centralized site, as the Exporter and Importer Module are separate applications.

### **Why GlassHouse...**

Whether your organization is focused on reducing cost and risk or improving service levels, GlassHouse's vendor-independent consultants quickly identify the performance, cost effectiveness, and risks of your existing archive environment and offer a quick, efficient and practical path to improvement. Our experts develop remediation plans designed to expand the functionality and capacity of the current environment, to improve the utilization of existing archive assets.
